

REPORT2020

TENTH EDITION
Coatings for a more sustainable world

October 6 – 8, 2020 - Centro Costa Salguero – Buenos Aires

CALL FOR PAPERS

Today more than ever, industries are facing many challenges such as developing an improving their products and services by means of innovation and the application of technologies that imply a low environmental impact, while financially feasible and compliant with new sustainability objectives and care for our environment.

Within the sphere of the tenth edition of ATIPAT Technical Congress, we hereby invite our suppliers and their professionals, academic researchers and experts in coatings, inks and adhesives to put forward any news and innovations which fall within the realm of the above challenges and new need and preferences of consumers.

All new ideas and solutions to matters related to sustainable raw materials, improvements of efficiency and automation of all production processes, customer services, reutilization of residues, durability and analysis of product life cycle, reduction of VOC and impact of the environment, will fall under the scrutiny of this tenth edition of the 2020 Congress Report.

A further focus of attention shall be the presentation of innovative technologies, performance improvement, functionality and easy application of coatings, updating of trial methodologies and standardization plus the analysis of changes introduced in the current legislation.

It should be noted that Report 2020 will provide a great opportunity both in Argentina and the Latin American regions, for technologist and professional business experts to establish new contacts as well as acquire new knowledge and information, within the realm of common interest and business affairs.

With these premises and proposals it is we invite you to participate in our congress-Report 2020 and to present your works according to the characteristics described therein.

REQUIREMENTS

The presentations for the congress should rely upon an academic base and include a description of the technologies and technical mechanisms in order to promote learning and development of the assistants. An ideal piece of work should put forward a problem, explain it from the theoretical approach and offer a solution. No mention of brands is allowed although this does not apply to technologies.

The presentations differ from the so-called Technical-commercial to be held in the afternoon which duration are of 25 minutes plus 5 minutes assigned to questions, contents being the responsibility of the participating enterprises with stand or as sponsors. There are no restrictions in regard to the mention of brands for the Commercial presentations.

The language used for the presentation is either Spanish or English with simultaneous translation. The presentation modules have an extension for 50 minutes plus 10 minutes allotted to questions. These will be carried out in the mornings of the days of the event. It should be noted that the evaluating committee will define the convenience to hold one or two modules bearing in mind the academic requirements of the congress.

In view of the fact that the congress' duration is stipulated for three days in the morning simultaneously in two rooms, there are only 24 presentation modules available. It is therefore suggested to anticipate the titles of presentations by speakers together with summary of the paper and cv of incumbents as soon as possible. Furthermore, participants should deliver their presentations together with full text within 60 days further to the acceptance of the proposal by Atipat Scientific Committee.

Once the papers are presented at the congress they may be further published in Atipat's Rec magazine.
